MAKING A LAB SAFETY POSTER!

Working in the lab is a fun and dynamic business! However, it can be too easy to forget a lab safety rule and create a dangerous situation! Therefore, it's important that we have constant reminders of the lab safety rules that we have discussed.

- For the assignment, you will be creating a one-page poster to highlight one of the safety rules from the lab safety contract. You could choose to create a split-page "Do" and "Don't Do" with pictures of someone being safe versus unsafe. It's up to you! You have creative freedom with how you choose to showcase your rule, as long as it's visual and obvious!
- Remember that diagrams in science should always be labeled. Please label any lab equipment that appears on your safety poster.
- On the back of your mini-poster, you will need to write out your answers to the following questions. Please write using complete sentences:
 - State the rule
 - Explain during what situations the rule applies
 - Explain what could happen if the rule is not obeyed
 - Explain how you would handle an accident if it occurred

SAFETY POSTER RUBRIC

Poster Requirement:

State the rule & number from the Safety Contract: _____/10 points

Colorful, labeled diagram depicting the rule: _____/10 points

Written Requirement:

State the rule: _____/10 points

During what situations the rule applies: _____/10 points

What can happen if the rule is not obeyed: _____/10 points

How would you handle an accident if it occurred: _____/10 points

Total Points _____/60 points
